

Low Level Folding Stand

SPLLS-9001

AN ESSENTIAL STAND FOR ANY MAINTENANCE FACILITY

The new generation of universal aviation stands, the Spika Low Level Folding Stand is durable, versatile, easy to move, and an essential piece of equipment for any maintenance facility. The stand is compliant with OSHA 1910 and improves efficiency and access in aviation, industrial, heavy equipment, and tactical vehicle maintenance facilities. This stand is approved to be used in lieu of NSN #1730-00-269-8283.

Features

- Safety side rails offer protection while stand is set in the high-level position
- Easily moved by one person
- Polypropylene bumpers protect floor and side rails from scratches when in the low-level position
- Adjustable latches keep the upper stair section secure while being moved or in use

Versatile, Durable, and Safe

The Spika Low Level Stand is compliant with OSHA 1910D and has a designated workload of 750 lbs, tested to a 4x safety factor.

Benefits of the Low Level Stand include:

- Constructed of corrosion-resistant, lightweight aluminum
- Olive Drab or Desert Sand powder-coating offers clear visibility, long lasting durability and OSHA-compliant fall protection
- Extruded plank deck provides sure-footed traction
- 12" casters provide easy movement
- 3-year warranty

About Spika

Spika Welding and Manufacturing specializes in designing, developing, and manufacturing innovative and industry-leading aircraft maintenance stands for military war fighters and maintainers, as well as for commercial aircraft maintenance facilities. Our stands and platforms meet or exceed OSHA requirements while promoting process efficiency by drastically improving upper-level access for your maintainers and technicians. When you work with Spika, you work one-on-one with our designers and engineers to assure the product you buy is ideal for your needs.

Adjustable latches keep the upper stair section secure while being moved or in use
